HYPER LINE

FEATURES

- For High Feed & Speed Machining
- For Machining Alloy Steel & Super Alloys Like Stainless Steel, Inconel Etc.
- Made From Ultra-Fine Carbide
- Smooth Coat for Better Wear Resistence & Chip Flow

HARD LINE

FEATURES

- High Speed Machining Application
- For Machining of High Hardened Material Upto 62 HRC
- Wide Range & Series to Suit Die & Mould Industry
- Made From Submicron Grade Carbide with High Cobalt
- Hard Coat For Better Wear Resistance at High Speed Finishing Application

PRODUCT CATAGORY

CMT LINE

FEATURES

- Custom Made Tools
- Designed & Built for Specific Application

ROTARY BURRS

FEATURES

- Wide range to Suit At Most Application
- Available in Std Cut / Diamond Cut & Non Ferrous Cut
- Tin & Tiailn Coated on Request.
- Long Shank Burrs on Request.

FEATURES

- High precision short cylindrical center mounting
- Flimsy part are specifically engineered by quenching for greater durability and extended life.
- Adjusted independently to center suitable for processing special with superior gripping force.

FEATURES

- High precision short cylindrical center mounting
- Flimsy part are specifically engineered by quenching for greater durability and extended life.
- Adjusted independently to center suitable for processing special with superior gripping force.

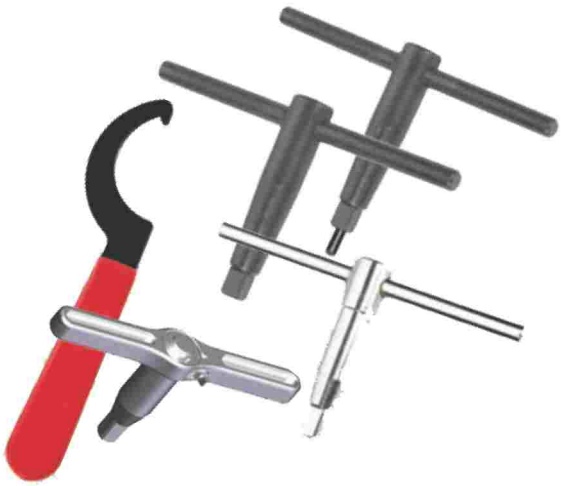

PRODUCT CATAGORY

- Comfortable Surface of sleeve and positive gripping can apply more output torque
- By using specialized anti-thrust bearing to convert hand - applied torque into superior gripping force.
- Aesthetic and pratical design of surface make sure the front and rear sleeve cooperate with each other more effective and reduce the run out of sleeve.
- Color and style can be made according to the customer's demands to match different drills.

CLASSIC ADJUSTABLE TORQUE WRENCH

PRODUCT CATAGORY

FEATURES

- Industrial application with durability.
- Tolerance of torque +/- 4%.
- Four torque sizes for easy scale reading.
- Push through mechanism for easy repair.
- Loud click sound when required torque is reached.
- Length independent mechanism for accurate torque.
- Quality meets DIN ISO 6789 & ASME B107.14M-2004

ADJUSTABLE ALUMINUM TORQUE WRENCH

FEATURES

- Industrial application with durability.
- Lightweight yet robust; housing is made of aluminium alloy.
- Multi-lever mechanism brings length independence and accurate torque.
- Loud click sound and strong impulse when torque value reached.
- Chrome-plating finish strengthens the material hardness & anti-collision.
- Quick pull out & easy adjustment with unique crank .
- Tolerance of torque ± 3%.
- Quality meets DIN ISO 6789 & ASME B107.300-2010.

1. Drill a hole to clear the Allen screw.
2. Insert Allen screw through die and pass the screw through hole.
   Screw the punch on the projecting Allen screw until it makes contact with the metal to be punched.
3. The Allen screw is then turned by means of an Allen key and the punch will cut cleanly and evenly through the metal.
